<b>Introduction</b>	<p>The children the volunteers will teach come from families with low economic resources; therefore the volunteers will be able to observe and appreciate their everyday life habits and culture through practical and social involvement and feel like they are actually making a change for these kids as they pass on important skills for each child's future both on a personal and academic level. Moreover, by working with national volunteers, they will have the chance to get involved in the Moroccan community not only at the youth center but also outside of work.</p> <p>Activities:</p> <ul style="list-style-type: none"> <li>• Scholar support</li> <li>• Theatre classes</li> <li>• Cultural activities</li> <li>• Work camps</li> <li>• Seminars</li> <li>• Excursions</li> </ul>

<b>Camp advert</b>	<p>The aim of this project is to provide free scholar support and linguistic reinforcement to children and young people currently attending school or university. In Morocco's public schools, the deliverance of language classes is comprised of many factors such as crowded classrooms and lack of trained teachers due to an overall low education level, especially when it comes to English. Private summer lessons are of course available but too expensive for most families. This project offers the most disadvantaged students the opportunity to achieve a higher academic level.</p>

<b>Introduction</b>	<p>Geographically and figuratively speaking, Morocco is the “Door of Europe”. Each year many immigrants and refugees from the southern countries of Africa arrive illegally in the country and frequently get stuck in bad living conditions. National programs exist to offer them educational, professional and cultural support reflecting the tradition of solidarity and hospitality that characterizes Morocco.</p> <p>The international volunteers will work as a team with the national volunteers; therefore they will be able to observe and discover not only the immigrants’ way of life but also Moroccan habits and culture through practical and social involvement. This kind of project is usually very rewarding on a personal level for the volunteers because if their implication is genuine they will rapidly feel they are making a real change in the lives of the refugees whose only chance to get access to a better education is this type of program. By working closely with national volunteers, international volunteers will have the opportunity to quickly develop ties with locals and get involved in the community not only at work but outside as well.</p> <p>activities: • <b>Teach communication classes</b></p> <ul style="list-style-type: none"> <li>• Cultural activities</li> <li>• Work camps</li> <li>• Seminars</li> </ul>
